Adam Abakar, a native Darfuri, had just completed college in Khartoum, Sudan, when he heard disturbing reports that genocide was being committed in Darfur. He began secretly documenting the atrocities and gathering evidence of his government's involvement. He was caught by government troops, shot, beaten, and tortured but managed to bring his microchip of photos out of Sudan. He's lost his home, family and country to accomplish his mission. Now he is here in the US sharing his photos and his personal experience to expose the atrocities and bring awareness to the dire situation in Darfur.

Tzivia Schwartz Getzug is the Executive Director of Jewish World Watch, a Los Angeles based non-profit organization dedicated to educating and advocating on issues of genocide and egregious human rights violations, and providing humanitarian relief to survivors of genocide. In 2007, Tzivia went to Chad to bear witness to the genocide and to visit our Jewish World Watch projects on the ground.
